Education

Sardar Patel Institute of Technology — Mumbai, India
Bachelor of Technology in Electronics and Telecommunication Engineering — *Aug. 2020 – Jun. 2024*

Experience

Software Engineer, AI & Data Platforms — Sep. 2025 – Present
Bull AI — *Mumbai, India*

- Built and hardened LangGraph-based AI research workflows for Indian equities across market analysis, financial projections, and annual-report processing, integrating Supabase persistence, Qdrant retrieval, prompt versioning, schema validation, and multi-provider LLM clients
- Designed a revenue-segmentation extraction pipeline using retrieve/parse/discover/extract/validate stages with content-addressed step caching, prompt-schema contract tests, eval harnesses, and deterministic replay for auditability
- Engineered market-data poller and transform services for Indian exchange live, EOD, and corporate-action feeds into Supabase/PostgreSQL with trading-window scheduling, restart-safe checkpoints, audit tables, and Docker/GCP Cloud Build deployment
- Developed an India-focused financial copilot using FastAPI SSE, React/Tailwind, LangChain/LangGraph, Gemini/OpenAI, MongoDB, Supabase, and Qdrant for company resolution, market snapshots, document RAG, and chart-ready responses
- Built batch-processing workflows for concall summaries, competitor analysis, and revenue visualization using Vertex AI/Gemini, schedulers, webhooks, and storage-backed chart generation

LLM Trainer, Software Developer – Frontend Specialization — Sep. 2024 – Sep. 2025
Scale AI — *Remote*

- Evaluated, corrected, and ranked LLM-generated frontend code for React.js, Next.js, and TypeScript, producing high-signal RLHF/SFT feedback for code-generation quality

Full Stack Developer — Sep. 2024 – Sep. 2025
Freelance — *Remote*

- Delivered 15+ full-stack web applications using Next.js, React, TypeScript, Prisma, PostgreSQL, MongoDB, and Express.js, including AI-powered image-processing and content-management features

Technical Architect Intern — Jan. 2024 – Jul. 2024
BNP Paribas — *Mumbai, India*

- Built a Spring Boot and React data-management application with REST APIs, reducing data-processing time by 30% for workflows serving 500+ daily users
- Developed a Project Lifecycle Management system using Spring Boot, React, Camunda BPM, and H2 Database, with dynamic forms and workflow automation for 100+ concurrent projects

Projects

Thumbnail AI | *Next.js, TypeScript, AI/ML APIs, Cloudflare* — 2024

- AI thumbnail generation with background removal, templates, and batch workflows

Blog Platform | *Hono, Cloudflare Workers, React, Prisma, PostgreSQL* — 2024

- Auth, comments, dark/light mode, and 95+ PageSpeed

Technical Skills

Languages: Python, TypeScript, JavaScript, Java, SQL, HTML5, CSS3
AI/LLM: LangGraph, LangChain, RAG, LLM evaluation, prompt engineering, schema validation, Gemini, OpenAI, MiniMax, DeepSeek, embeddings
Backend/Data: FastAPI, Node/Express, Hono, Spring Boot, REST APIs, Redis, MongoDB, Supabase/PostgreSQL, Qdrant, Prisma, Playwright
Frontend/Cloud: React, Next.js, Tailwind CSS, Cloudflare Workers, Docker, AWS, GCP Cloud Run/Build, Git
